

Environmental Policy

"At Accon we understand that every employee is responsible for their environmental performance in the value chain."

ENVIRONMENTAL POLICY OF ACCON GROUP

Accon Group is a major supplier of bulk packaging solutions to the industry in Europe and specializing in the Nordic countries. With over 30 years of experience, Accon's focus has always been to be a reliable business partner that offers packaging solutions of high quality.

The environmental commitments of Accon are based on company strategy and values - and driven by the commitment to prevent environmental pollution and to reduce our environmental impact.

In detail:

- We at Accon will always meet applicable legal requirements and company commitments.
- We understand our responsibility in fighting climate change and we will systematically work with continuous improvements and innovations - striving to reduce our carbon footprint and promote resource efficiency.
- We will actively seek innovative solutions to minimize waste generation, conserve energy and promote the use of renewable resources.
- We are operating in a manner to minimize the environmental impacts of our products in every possible way.
- We will continue to develop the circular economy through our "Accon Greentech" recycling and reconditioning of the products we deliver.
- All our units are committed to circular economy principles and proper waste management.
- We will prevent water and soil contamination, emissions to air and conserve biodiversity around our own production units.
- We shall commit to openness and transparency to all our relevant stakeholders.

At Accon we understand that every employee is responsible for their environmental performance in the value chain. Therefore, we train our staff regularly enabling them to bear their responsibility.
